This is test of the latex font size in matplotlib. No more guessing! See the accompanying readme.markdown for more info.

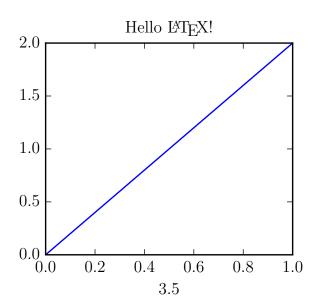

The text width is 6.47699 in.

The hsize is 3.1693 in.

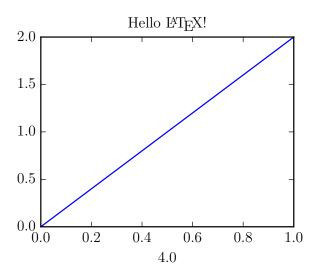

The column width is 3.1693 in.

Hello L⁴TEX!

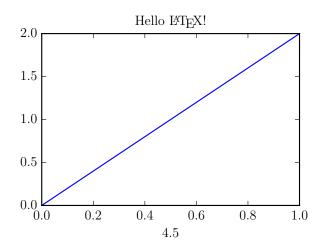

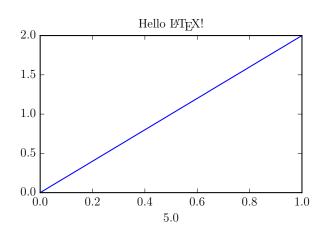

## Hello L⁴T<sub>E</sub>X!

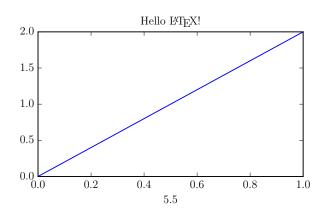

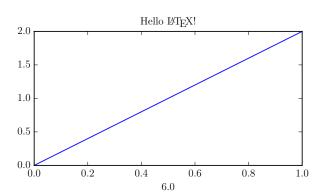

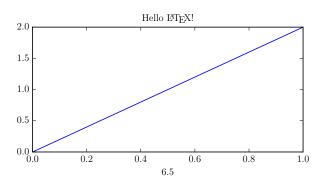

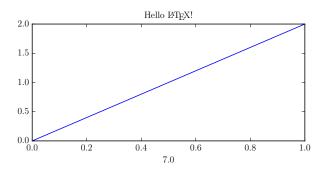

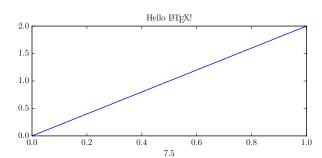

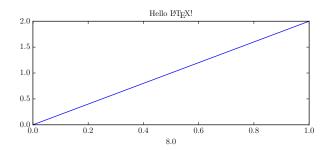

## Hello L⁴T<sub>E</sub>X!

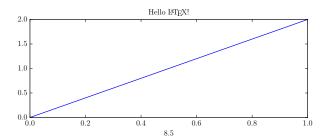

## Hello L⁴T<sub>E</sub>X!

ing. This text should show what a printed tent, but the length of words should match text will look like at this place. If you read the language. this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original

Hello, here is some text without a mean- language. There is no need for special con-
